## **CAD Masters, Inc. Supports Autodesk Assistance Program for Displaced Workers**

CAD Masters, Inc. will work with Autodesk to provide education and resources to assist customers in remaining competitive during the tough economic times.

**Walnut Creek, CA, April 27, 2009** – CAD Masters, Inc. today announced it will participate in the Autodesk Assistance Program for displaced workers, providing education, support and tools to its customers. The Autodesk Assistance Program will help people enhance, maintain and improve their 3D design technology skills to remain competitive in the marketplace.

CAD Masters, Inc. will be offering a variety of services and education programs to its design and engineering customers including 13-month educational software licenses, free online training and certification.

“We believe that this program will be of great help to unemployed persons who need to improve their technical skills in order to weather the storm and emerge with a competitive advantage once the economy starts to shift.” says Michelle Self, President of CAD Masters, Inc.

As part of the Autodesk Assistance Program, CAD Masters, Inc. will be offering all of the regularly scheduled AutoCAD, Revit Architecture and AutoCAD Civil 3D training classes at half the price. To take advantage of these significant cost reductions, you will need to register with Autodesk at [www.autodesk.com/assistance](http://www.autodesk.com/assistance), email the confirmation to [aap@cadmasters.com](mailto:aap@cadmasters.com), after which you will receive a promotional code that could be used to redeem the discount towards certification or training.

In today's economic climate, customers need interoperable and flexible technology tools that can help them deliver projects more quickly and cost-effectively with fewer resources – advantageous both now and when the economy turns. By participating in the Autodesk Assistance Program, CAD Masters, Inc. gives displaced or out-of-work design and engineering professionals the opportunity to enhance existing skill sets and remain active in the professional community.

## **About CAD Masters, Inc.**

CAD Masters, Inc. has been California's leading CAD Implementation and Services provider and Autodesk Value Added Reseller since 1994. CAD Masters, Inc. has achieved Autodesk's highest level of authorization - Autodesk Premier Solutions Provider (PSP) for Civil and Infrastructure Engineering. The Architects and Professional Engineers on staff at CAD Masters, Inc. have many years of real-world design experience using Autodesk products and have assisted with the integral development of effective CAD implementation programs in both the public and private sector.

CAD Masters, Inc. operates several offices covering California and Northern Nevada. CAD Masters' facilities are recognized as Autodesk Authorized Training Centers and Certification Centers, providing Autodesk approved training and certification courses for professionals. Having been long recognized for the value of our knowledgeable staff, CAD Masters, Inc. is well prepared to help clients overcome all obstacles with well-planned implementation and training of the latest technology.

CAD Masters, Inc. is also developer of CMI Standards Manager for all AutoCAD-based products, including Civil 3D, Map 3D, AutoCAD MEP, and Architecture focusing on a comprehensive set of CAD standardization tools specifically designed to automate standards within your Autodesk software.
